

Planet | **Retail Access Solutions**

Planet | **Retail Access Solutions**

The retail sector is a vast, dynamic and demanding one. From banks to bookmakers, supermarkets to high-street retail outlets, companies regularly go through shop refits and are known to change the store's interior depending on the promotion.

Being a supplier to the retail sector, Planet Platforms has grown to understand your requirements, and has developed a range of access solutions to make everyday tasks as easy and safe as possible. Helping you comply to stringent Work at Height (WAH) regulations, these access solutions range from a low-level portable podium step to a mobile trailer scissor lift that will serve the needs of: Maintenance, shop fitting, merchandising, shelf stocking and warehousing.

PROdeck™

by Planet Platforms

The portable, low-level access solution.

Lightweight at only 25 kg, the PROdeck™ folds flat and can be easily transported.

Offering two working platform heights of 700mm and 950mm, the PROdeck™ has a maximum safe working load of 150kg.

Dimensions:

730 x 1355 x 2005mm (open)

730 x 377 x 2005mm (closed)

PROdeck™ conforms to BS EN 14183-2003.

Suitable for retail applications such as shelf stocking and general maintenance.

JLG 10 MSP

JLG's stock picker has the space and capacity to help you get the job done more efficiently and with ease.

Working height of 4.88m and material tray capacity of 113kg.

Point & Go® One-Hand Drive and Steer System.

Ideal for use in busy environments due to compact dimensions and zero turning radius.

Maintenance free sealed gel batteries and anodised aluminium mast.

Suitable for retail and warehousing applications such as stock checking and picking.

POWER TOWER™

by Planet Platforms

This portable, powered access tower features simple push button basket controls and is ready for use in a few seconds.

No erecting, dismantling or climbing involved.

Working height of 5.1m and a platform height of 3.1m. It is compact at only 0.78m wide, which enables it to pass easily through standard doorways.

Simple push-around unit.

Suitable for retail applications such as stock picking and warehousing, merchandising, and general maintenance.

JLG Toucan Duo

The stock picker that's packed full of outstanding features.

Working height of 6.00m and material tray capacity of 70 kgs

Powered material tray with optional belt and end guard making it ideal for the transportation of bulkier items.

Compact dimensions and a low stowed height of just 1.8m allows ease of access through doorways.

Part of a 3 model family that share many of the same features. The other 2 models are personnel lifts.

Suitable for retail and warehousing applications such as stock picking, merchandising and general maintenance.

TP9000™

by Planet Platforms

The mobile trailer scissor lift that doesn't need a trailer for transport.

Can be set up by one user in a matter of minutes whilst offering the lift capacity for a two-man operation.

Suitable for vertical work height of up to 9 meters and removable handrails (will fit through a standard double door when removed).

Simple-to-use intelligent in-cage or ground controls making it optimum for use in a fleet or end user role.

Suitable for retail applications such as internal or external general cleaning and maintenance including forecourt upkeep.

20 MSP

Soon to be launched, the 20 MSP by JLG is ruggedly designed to serve a broad range of applications.

Working height of 7.8m and a large fold-down material tray with a high capacity of 113kgs.

Driveable up to full height (no outriggers).

Choice of 'quick-change' platforms available including a narrow version and a platform with a deck extension.

Part of a 3 model family that share many of the same features. The other 2 models are personnel lifts.

Suitable for retail and warehousing applications such as stock picking, merchandising and general maintenance.
